IvsNewsManager is a revolutionary solution for the production of television Infochannel kind programs, adaptable to any kind of demand; television news, live sports, elections, etc. It was realized "around" real needs of television broadcasters who have collaborated with us to the realization of the project. IvsNewsManager improves any other pre-existent realizations under all the points of view; with only one system, thanks to the Leitch dpsQuattrus power, we are able to add 4 video sources, live and coming from HDD and to scale, rotate and to position them through 4 3D Hardware DVEs, two tickers (two indipendent crawl rows, different for colour, size, font, speed, direction, trasparency, shadow), a real time customizable clock (date, day, year, hh:mm:ss), other graphic layers (to add other news, broadcaster, sponsor, decorative elements, logos, etc.).

Video Quality is the highest possible, all graphics and videos can be 1:1 uncompressed. Inputs are SDI (optional), Component, Composite, Y/C. All graphics have a perfect antialiasing as well as style tools (shadow, color, font, size, etc.) All editing features of Leitch dpsQuattrus, VelocityQ and the other Leitch tools are preserved,

Language - Currently available in English and Italian languages, ivsNewsManager can be easily translated into any language, with any font specifications.

Gui Screenshot

All the elements are dynamic; it is possible to change all during the live broadcast; change, add, remove, change the order of the news and of the Clips, change IN-OUT of the video clips (Trim) during the Playback, change colour, size, transparency and speeds of the Crawls in live broadcast, etc.

Realtime Clock Generator
Animated Background
Logo Inserter

Live Input DVE1
Ticker with 2 indipendent rows
Playlists/Live Input DVE2 & DVE3

Some presets are bundled with the software but through the built-in tools(DVEs, graphic layers, etc.), any users can create his own presets. The news can be updated or added both locally and remotely, through unlimited clients or automatic xml file recognition. For interactive TV programs, ivsNewsManager can display directely **SMS** sent by mobile phones.

Pricing Informations

A standard workstation ivsNewsManager equipped with Leitch dps Quattrus 4x4 lists 19.000,00€. Price may vary on system configuration and inputs availability. Cheaper solutions, featuring dps Velocity and Quattrus 0x4 hardwares will be available in Q4 2004. IvsNewsManager is available as software only too.
